

MUHAMMAD UMER NADEEM

Software Engineer

Lahore, Pakistan | umernadeem005@gmail.com | 0348 4162005

PROFESSIONAL SUMMARY

Backend-focused Software Engineer with a full-stack skill set and hands-on experience owning products end-to-end, from system architecture and database design through production deployment and infrastructure management. Builds scalable SaaS platforms, ERPs, and role-based admin systems using Laravel, PHP, MySQL, and RESTful APIs, with working knowledge of React. Comfortable managing Linux production environments and third-party integrations (Stripe, auth providers, email delivery), and experienced mentoring junior developers through code review and architecture guidance.

TECHNICAL SKILLS

Languages & Core: PHP, JavaScript, HTML5, CSS3, SQL

Frameworks & Libraries: Laravel, Bootstrap, Tailwind CSS, jQuery, React (basic), Material UI, AJAX

Databases & Caching: MySQL, SQL Server, Redis

APIs & Integrations: RESTful API design, Stripe, Postman, social/auth providers

Infrastructure & DevOps: VPS administration, CloudPanel, Supervisor, cron/queues, Linux hosting management, GitHub

CMS & E-commerce: WordPress, Shopify (Liquid)

Systems & Domains: ERP, RBAC, POS/invoicing, CRM, LMS platforms

PROFESSIONAL EXPERIENCE

Software Engineer

Aug 2025 – Present

SYB Business Ecosystem · Lahore, Pakistan (On-site)

- Owns end-to-end backend development for multiple SaaS products and business web applications, system architecture, database design, and production deployment, using Laravel, PHP, MySQL, and RESTful APIs.
- Builds reusable CMS modules and role-based admin panels for content management, user management, reporting, and payments across the company's product suite (see Key Projects).
- Integrates Stripe, social authentication providers, and other third-party APIs, and delivers custom WordPress and Shopify builds for additional business needs.
- Manages Linux-based production infrastructure (VPS, CloudPanel, Redis, Supervisor, CRON jobs/queues) and business email infrastructure (DNS, SPF, DKIM, DMARC).
- Mentors junior developers through code review and architecture guidance, and collaborates cross-functionally to translate business requirements into scalable technical solutions delivered on schedule.

Full Stack Developer

Jun 2024 – Jul 2025

Algo Soft Tech · Lahore, Pakistan (On-site)

- Built dynamic, SEO-optimized, high-performance web applications using Laravel and Bootstrap, focusing on reusable components and client-side optimization.
- Designed optimized MySQL/SQL Server databases and wrote complex queries to improve data handling performance across multiple client projects (see Key Projects).
- Designed and implemented secure RESTful APIs enabling seamless communication between frontend and backend systems.

KEY PROJECTS

SYB BUSINESS ECOSYSTEM

SYB Business Ecosystem Platform — *Laravel, React, MySQL, Stripe, REST APIs*

Multi-service business platform with separate customer/admin dashboards, social login (Google, Facebook, email), dynamic service-request form builder, Stripe invoicing, and full RBAC administration.

Solicitors Chambers — *Laravel, React, MySQL, Stripe*

UK legal case-management platform with dedicated Admin, Client, and Solicitor portals for onboarding, case assignment, contracts, document storage, secure messaging, and Stripe payments.

Study2Uni — *Laravel, React, MySQL*

UK-focused student admission platform connecting international students with universities, application tracking, document uploads, and a scraped database of UK universities and programs.

SYB Hedayat — Online Quran Academy — *Laravel, React, MySQL*

Learning platform with Admin, Teacher, and Student dashboards covering teacher approval workflows, course/enrollment management, scheduling, and attendance tracking.

DiscountOye.pk — *Shopify, Liquid, JavaScript*

Fully custom, performance-optimized Shopify theme for a consumer electronics store, with advanced filtering and promotional campaign tooling.

Additional platforms: Seth SYB (perfume e-commerce with Stripe & COD checkout) and ApplyVisas (multilingual visa-consultancy site with dynamic inquiry forms).

ALGO SOFT TECH

Algo ERP System — *Laravel, MySQL*

Multi-module, role-based ERP spanning procurement & inventory, HRIS/payroll, financial accounting, sales & CRM, project management, and BI reporting, built on a reusable controller architecture.

Digital Invoicing System — *Laravel, MySQL*

FBR-integrated point-of-sale and invoicing system with product/stock management, custom PDF invoice and receipt generation, and role-based access control.

ArenaX — *Laravel, MySQL*

E-commerce and gaming-event platform with secure checkout, real-time sales analytics, and digital entry-card generation for enrolled event participants.

Additional projects: ERP for Textile Import Solutions (POS & inventory, SQL Server) and Super Max Filters (Laravel product catalog site).

ADDITIONAL EXPERIENCE

Email Marketing & Fiverr Account Manager

Oct 2020 – May 2024

Prism Design Studios · Lahore, Pakistan (On-site)

- Managed email marketing campaigns and Fiverr account operations alongside full-time BS IT studies, overseeing client communication, lead generation, and sales performance across both channels.
- Used Excel automation and data-driven strategies to improve outreach deliverability and campaign efficiency.

EDUCATION

Bachelor of Science, Information Technology (BSIT)

Oct 2020 – Aug 2024

University of Education, Lahore
